We have two different control units available: **FFV modulator + FFV Modulator USB**

The two control devices differ really only in the type of setting. The FFV modulator is adjusted by means of potentiometers 2 and the USB FFV modulator is adjusted by means of PC software.

Select the number of cylinders of the engine, the plug type of the injection nozzle and the polarity of the desired Green Spirits control unit. The various injector connector and a guide for measuring the polarity can be found [here](#).

The safest method is to plug look up the vehicle if you are not sure of the plugs, you can also photograph the plug and send us a picture or ask in your workshop. Maybe we can also help if you provide an [email](#) send your vehicle data.
